

Application freeze from August 1 through September 1, 2023

Approved by the SPKP on 5/23/23

Due to the regulatory changes coming into force on September 1, 2023, a new online portal is required for applications, which will also come into operation on September 1, 2023.

The new online portal will make submitting an application easier, automate certain processes, and offer applicants new functions such as the ability to search for recognized courses.

Due to the system migration, from August 1, 2023, onwards, temptraining will only be able to process applications that have been submitted prior to that date. The current online portal will not be accessible from July 31, 2023, and it will not be possible to submit any new applications in the interim period.

Applications from August 1, 2023, may be submitted in the new online portal from September 1, 2023. From September 1, 2023, you will now also be able to apply to join courses that have started in the last 12 months even after the course has begun.
